What is the BioPACIFIC MIP Digital Ecosystem Portal?

The BioPACIFIC MIP Digital Ecosystem Portal serves as the authentication server and entry point for all BioPACIFIC MIP-related web applications and shared digital tools (as shown in Fig 1). Users can log into the ecosystem using any email account, with simplified access for Gmail-based accounts, including UCSB and UCLA accounts. Once approved, users can access various digital tools such as the Electronic Laboratory Notebook (ELN) and the Laboratory Information Management System (LIMS).

Fig 1. Diagram showing the manner in which systems are, or can be, linked to the portal.
