## LumiDox Gen II LED Plate

LumiDox Gen II LED Plate	png	Tool Type: LED Plate for Cell Culture	Manufacturer: Analytical Sales	Location: Elings Hall 2436
Principal Scientist				
luan Manuel Urueña				

## **About**

jmuruena@ucsb.edu

The LumiDox Gen II LED Plate is an innovative tool designed for precise light delivery to 96-well cell culture plates. This system utilizes high-intensity LEDs arranged to provide uniform, controlled light exposure across all wells, making it ideal for light-activated cellular experiments. The plate allows for customizable light intensities and wavelengths, supporting a variety of experimental conditions. The LumiDox Gen II's user-friendly interface and robust design enable consistent and repeatable illumination, advancing research in areas such as optogenetics, photobiology, and cell signaling.

## **Detailed Specifications**

LED technology: High-intensity LEDs Compatible formats: 96-well plates Wavelength range: 380-780 nm

Power control: Adjustable power settings

Uniformity: High across all wells

Temperature control: Integrated cooling system

## **Safety Concerns**

The LumiDox Gen II LED Plate produces high-intensity light, which requires the following safety precautions:\ • Always inspect the LEDs before use to ensure no damage or malfunction.\ • Do not stare directly at the light sources during operation.\ • Use protective eyewear rated for specific wavelengths, especially when working with high-intensity light in the UV range.\ • Ensure that all users are familiar with proper operation procedures and safety protocols outlined by the manufacturer.
