

## What is the BioPACIFIC MIP Digital Ecosystem Portal?

This Portal serves as the authentication server and entry point for all BioPACIFIC MIP-related web applications and shared digital tools, as shown in Fig 1. Users are able to log into the ecosystem using any email account, with simplified access for Gmail-based accounts, including UCSB and UCLA accounts. Approved users can access digital tools, including the Electronic Laboratory Notebook (ELN) and Laboratory Information Management System (LIMS).

*Fig 1. Diagram showing the manner in which systems are, or can be, linked to the portal.*
