# Shimadzu Nexera Analytical HPLC-MS

**Tool Type:** Analytical Characterization

Location: Elings Hall 2411

Principal Scientist	Training and Operations Lead
Morgan Bates	Zachary Nett
morganbates@ucsb.edu	zjnett@ucsb.edu

### **About**

The Genevac EZ-2 4.0 Elite is a high-performance parallel evaporator system designed to efficiently remove solvents from samples through evaporation. It uses advanced vacuum and centrifugal technology to evaporate a wide range of solvents, including volatile organic compounds and aqueous solutions, without overheating or degrading sensitive samples. The EZ-2 Elite features a dry scroll pump and is optimized for removal of even the highest boiling point solvents (> 165 °C), such as DMSO and NMP.

## **Solvent Guidelines and Sample Holder Options**

#### **Solvent Compatibility**

SP Genevac evaporators are robust systems designed to be resistant to the most common solvents and acids used within the chemistry laboratory, including TFA and HCl. **However, the Genevac is not compatible with the following:** 

- · Carbon disulfide
- · Diethyl ether

- 1,2-Dimethoxyethane
- 2-Ethoxyethanol
- Hydrogen cyanide
- Pentane
- Triethylsilane

### **Sample formats**

Sample holders for the following formats are available:

• Vials: 40, 30, 20, and 8-mL sizes

• Test tubes: 16, 18, and 25-mm diameter and up to 150 mm length

• Centrifuge tubes: 50-mL size
